Stixis Technologies and Jidoka partner to deliver RPA solutions in three continents

Stixis Technologies, IT products and strategic services and consulting enterprise, building cutting edge technology solutions for transforming customer experience, expands into the Robotic Process Automation global market by signing a collaboration agreement for the implementation of Jidoka robots in the United States, as well as in India and South Africa.

Under this partnership agreement, Stixis will deliver state-of-the-art Enterprise Business Process Autonomation (BPA) services and solutions applying Jidoka's RPA technology for the development and orchestration of software robots.

By combining specific software and professional services, RPA (Robotic Process Automation) allows companies to automate their business processes by means of "software robots", programs that replicate human interactions with computer applications without modifying existing systems, reducing manual intervention in repetitive tasks by up to 80%.

"We are aware of the benefits in terms of savings and ROI optimization that RPA technology can deliver to companies, in our continuous commitment to excellence we have found in Jidoka the ideal partner for this automation journey", says Rayudu Dhananjaya, President and CEO of Stixis Technologies.

With the signing of this agreement, Stixis joins Jidoka's partner network, with an international presence in countries such as Spain, Mexico, Colombia, Panama, Portugal, Brazil, and Chile among others.

According to Jidoka's CEO, Víctor Ayllón, "The partnership with Stixis opens up challenging new opportunities to widely deploy our software robots in strategic markets such as the United States, India and South Africa, alongside a reliable and competitive technology partner".

About Jidoka®

Jidoka is a Robotic Process Automation (RPA) software that automates business processes replicating human behavior. Large companies from key economic sectors (banking, insurance, utilities, real estate, BPO...) around the world utilize Jidoka's software robots to automate their front and back office processes, freeing people of tedious and repetitive tasks. Developed by Novayre, Jidoka holds a prominent position in the global RPA providers ecosystem delivering powerful development tools combined with advanced enterprise level robot operations orchestration.

About Stixis®

Stixis is a software technology innovation services enterprise with its core client focus on strategic, transparency inspired excellence in Information Systems. With the reputation of leaving its indelible mark in enterprise consulting and service delivery engagements in diverse business sectors and domains through its core client focus on client-led products, client-strategy driven solutions and client-centric services.
